 - (iv) Develop a sustainability plan that also includes the financial, legal, structural/institutional implications of the AU adopting ACMAD as its technical arm.
 - (v) Propose a strategy for successfully presenting the request to AU Policy organs.
2. The AMCOMET Chair should lead members and the African Meteorology Community in showcasing the contribution of meteorology to development and climate action in Africa at COP-27.

3. Request AUC, AfDB and the organisers of the Africa Pavilion to secure space for an AUC-AMCOMET side event to present the Strategy and a panel discussion on resource mobilization

5. Request Partners to support the implementation plan the strategy, starting with the **urgent issue on funding the MTG-AMSAF for the preparations of Africa for a smooth transition to MTG**
