Draft Agenda:

Highway Scientific and Technical workshop

26 – 28 February 2018
Nairobi Safari Club
Nairobi, Kenya

Project Name: High Impact Weather Lake System (Highway)

Financed by:

UK Department for International Development (DFID), Weather and Climate Information Services (WISER) for Africa Programme, through the Met Office UK

Version 10.0
Created By: Estelle de Coning
Date: 22 February 2018

Main Objectives / Expected Outputs of the Scientific and Technical Workshop:

1. Have a common understanding of the value chain of the project and clarify the activities related to the science and infrastructure inputs, forecasting products and EWS products for end users.
2. Co-design of specific activities, as outlined in the WISER Guidance on Equitable and Inclusive co-production for Weather and Climate Services¹ under each output of the project, including agreement on timelines and logframe to align with the projects goals, milestones and budget
3. Explore and discuss the roles of each country to achieve the goals of the project
4. Identification of Principal Investigators or focal points and team members, as needed, for each output and activity at the national and regional level to achieve the goals of the project
5. Planning of Coordination Meetings between Principal Investigators or focal points
